## Step 1: Research

Use the questions (page 2) to generate ideas for your design. If you are working with others, break into small groups or partners, and take turns interviewing each other.

## Step 2: Analyze

Before you start the design process, analyze your responses. What words or phrases have the most meaning for you? What is the overall mood and tone? What is the common theme? What do you want people to know about you?

## Step 3: Brainstorm

Now it is the time to pull all your ideas together. Use the record template (page 3) to create mock-ups of your design. When working on your design, consider the following elements:

- Graphics create connection
- Color creates emotion
- Font style creates personality
- Scale creates emphasis

These elements should be viewed as moving parts which combine to tell a story. Use these online resources to learn more about [Color](#), [Elements of Art](#), and [Principles of Design](#).

## Step 4: Design

Now that you have completed your mock-up, it is time to design your record using paint markers and/or acrylic paint.

## Tips

- Create a new record label from a full sheet shipping label
- Oil based paint markers have a faster drying time and are more durable
